KENT CLEANING

ABOUT US

DISCREET | COMPASSIONATE | CONFIDENTIAL | EXPERIENCED

At DAS Kent Cleaning we understand our customers. We know this can be a very daunting or frightening time and we want to take away some of that stress. It's difficult to make that first step and seek help with your home but we are here for you every step of the way!

We can offer a friendly and non-judgemental chat and answer any questions you may have and keep you informed of our plans and progress.

Alternatively, if you are looking for a discreet and compassionate service after a tragic death, our experienced team is on hand 24/7, 365 days a year. We work with many service providers such as social services, NHS, charities, local authorities and councils, all three emergency services and many more.

We are fully qualified TRAUMA and BIOHAZARDOUS cleaners, specialising in the mental health and vulnerable persons sector. As a team we pride ourselves on high standards. We are fully insured, trained, all of our staff are DBS checked and we only use high quality professional products.

All biohazard and clinical waste is disposed of safely and in compliance with government regulation. We are a registered professional waste management service.

VOID PROPERTIES & SQUATS

At DAS Kent Cleaning we understand that properties have been left void for various reasons and we are trained and equipped to respond to the demands of these particular cleans. We will make these spaces clean and safe once again. This may include graffiti removal, removal of broken glass, sharps and junk.

WE SAFELY CLEAN & DISPOSE, SO YOU DON'T HAVE TO!

END OF TENANCY CLEANS & STUDENT CLEANS

Properties are not always left in the condition we would hope. Our team of experts are not fazed by any situation and will make these areas clean and safe again for your next occupants. However big or small, we would be happy to take this stress away from you.

NEEDLE SWEEPS & DRUG DEN CLEANS

DAS Kent Cleaning are fully trained, insured and prepared to remove needles and sharps from indoor and outdoor environments. We carry out a thorough search of a premises to locate and dispose of any sharps that may be present. It is paramount to dispose of sharps and their associated paraphernalia due to the huge health risks associated with them. We dispose of these items in line with Health and Safety regulations.

- Working in conjunction with other Companies & Organisations
- Fridge & Freezer collection & disposal
- House and Work Place Clearance
- Garden Clearance
- Outbuilding Clearance
- One off | Regular Waste Collection
- Fully Licensed | Insured

PIGEON GUANO

Not everyone is aware of the risk to your health with **Pigeon Guano** and **Mould**. Did you know Feral pigeons themselves can carry diseases and insects, but their guano can contain a variety of bacteria and pathogens. This includes Histoplasmosis, E coli, Ornithosis, Listeria and, when dried out, airborne particles that when inhaled, can lead to respiratory issues such as Cryptococcus Fungus and Psittacosis.
Let DAS Kent Cleaning take care of this for you in the correct way following all the appropriate guidelines.

MOULD

Now lets talk about Mould..... if you have damp and mould in your home you're more likely to have respiratory problems, respiratory infections, allergies or asthma. Damp and mould can also affect the immune system. When mould spores are inhaled, immune system cells surround and destroy them. But people who have a weakened immune system from illness or immunosuppressant medications have fewer infection-fighting cells. This allows Aspergillus to take hold, invading the lungs and, in the most serious cases, other parts of the body.

Mould is a risk to our health, it's incredibly dangerous to be living or working in this toxic environment. Our team of experts will remove all traces of mould and mildew from your home or working environment. Not all mould spores can be seen by the naked eye, our experts take care of this to make sure spores are not dispersed to another surface to multiply rapidly.

BED BUGS!

Bed bugs are parasitic insects from the genus Cimex, who are micropredators that feed on blood, usually at night. Their bites can result in a number of health impacts including skin rashes, psychological effects, and allergic symptoms.

If you're suddenly experiencing signs of a bed bug infestation in your home for the first time, they likely snuck their way in as a stowaway on a purse, luggage, or clothing. Secondhand furniture, particularly mattresses, box springs, couches, and chairs, may be harbouring hungry bed bugs.

If you have an infestation, call us in today!

BODILY FLUID CLEAN UPS

We have an emergency 24/7 callout service to deal with these situations. We will respond quickly, discreetly and efficiently. Bodily fluids, blood and faecal matter can carry viruses and pose a significant health risk to anyone in a property. We specialise in BioHazardous waste and will dispose of everything for you.

NICOTINE CLEANING & AIR PURIFICATION SERVICES

Professional nicotine cleaning and nicotine odour removal services for your home or business premises. Removal of nicotine stains, odour & smoke damage. If your property smells of nicotine or smoke, anyone living in it, be it humans or animals, are breathing nicotine which could cause a health hazard. This could have an impact on people and animals health. We offer professional ozone treatment and air purification service, helping us to tackle odours, cigarette tar and stains.

INFECTION CONTROL & OUTBREAK

We offer a specialist cleaning and disinfection package aimed at successfully reducing the risk of infection and contamination within your property or business.

HOARDING SERVICE

At DAS Kent Cleaning we feel passionately about helping you or your loved ones to get back the home you deserve. We understand that hoarding is a mental health condition and not a lifestyle choice. Please never feel embarrassed or scared. We are extremely compassionate, discreet and non-judgemental. We will plan strategies and keep you informed every step of the way.

THE DANGERS!

Being a hoarder can be very dangerous - there are significant risks of tripping over and hurting yourself, rat or insect infestation and a potential fire hazard. There is a risk to yourself, loved ones, pets and neighbours. The emergency services could find the property difficult to access and treat the patient. We are here to help you and make life-changing transformations.

MENTAL HEALTH CLEANS

Mental Health Crisis Cleaning may be needed if a client has been unable to clean their home for some time, or perhaps have not been getting rid of waste efficiently. This can lead to toxic odours, pest problems and many other issues.

Keeping the home clean can easily mount up and become an issue but we are here to help you and pride ourselves in transforming your home to a clean and safe space again.

CRIME SCENE DO NOT CROSS

TRAUMA CLEANING

DISCREET | COMPASSIONATE | CONFIDENTIAL | EXPERIENCED

We go the extra mile for our clients in making sure we can transform a property to a safe and secure building or home to enter.

Our trauma cleaning service covers many varieties of emergency cleaning needs, from stabbings, murders, accidents or suicides in a property and so on. Many of these cleans will include bodily fluid clean ups and/or safely removing infectious materials from a property. Each case is different and we are highly adaptable.

We offer several packages, for example if our client is hospitalised and needs a new mattress before coming home, if you wish us to take away belongings such as a cot after a tragic cot death or if you wish for us to use a locksmith to gain entry to a property following an emergency, our efficient team will be happy to arrange this discreetly and compassionately.

UNATTENDED DEATH CLEANS

We are here for you 24/7 and 365 days a year!

We understand that each situation is different and we are highly adaptable. We can provide a rapid response that is both discreet and non-judgemental. An unattended death may be days, weeks or months later and under many different circumstances. Rest assured our dedicated and trained team will deal with this situation for you.

Our personal approach means we can liaise over the phone, or face to face at a different location to avoid any further hurt or trauma.

Unattended death cleaning is usually carried out after emergency services and the coroner have finished in the property and taken the deceased to the coroner's office or local undertakers. Cleaning following death may mean decomposition and bodily fluids such as blood, urine and vomit often seep into porous materials and areas which are not visible to the untrained eye.

WE CLEAN UP THE UNTHINKABLE!
